

GARFIELD PARK CULTURAL LANDSCAPE REPORT

Appendix A: Chronology

This chronology is drawn from all available sources studied in the research effort for the Garfield Park Cultural Landscape Report. Documentary sources are cited in the endnotes.

- 1816** The State of Indiana admitted into the Union on April 19th.
- 1819** First white settlers arrived in the area.¹
- 1850s** Construction of the Jeffersonville and Indianapolis Railroad running south out of Indianapolis, passing through Bradley Woods, a forested area surrounded by farmland.² Today Bradley Woods is Garfield Park and the rail line is owned by Conrail.
- 1866** The park and playground system in Indianapolis began with 17.3 acres known as Camp Sullivan or Military Park on the west side of Indianapolis being turned over to the municipality by the state. Military Park is recognized today as Indianapolis' oldest park.³
- 1871** Dillard Ricketts, president of the Jeffersonville and Indianapolis Railroad sold Bradley Woods to a group of promoters, "horse racing fanciers". The promoters, known as the "Indianapolis Fair Association", built a one-mile track and fairground, called the Southern Driving Park.⁴ This track and fairground was intended to rival the State Fairgrounds in Military Park, circa 1852.
- 1872** The Indianapolis Fair Association held its first harness race and fair. The event was not a financial success.⁵
- 1873** The Association continued to suffer from financial troubles, prior to the economic slump known as the Panic of 1873. Two race events were held.
- 1874** Promoters sold the land to Sheriff N.R. Ruckle who in turn sold the 87.4 acres to the city for \$109,500.⁶ "(S)ince the ground was 'so far away from civilization' the city decided not to use it." The property was leased to the Indiana Trotting Association (ITA). The ITA closed the track after hosting 2 or 3 fiscally unsuccessful races.⁷

No public transportation serviced the property at this time. The property was a considerable distance outside the city and a time consuming journey by horse and buggy. Bradley Woods area was forested, surrounded by farms. "Sycamores and willows of great size and beauty grew there", and there was "an agreeable diversity of forest and meadow, level and ascent."⁸

GARFIELD PARK CULTURAL LANDSCAPE REPORT

Appendix A: Chronology

1881 The park was re-named in honor of President James A. Garfield after his assassination.

1888 A period of changes and improvements in park facilities began. The city allocated \$10,000 to the Park, part of which was used to build a bridge across Pleasant Run.⁹

1893-1894 A pond was excavated at the confluence of Pleasant Run and Bean Creek.¹⁰

1895 The first Indiana Parks Law was passed by the state in Jan 1895.

“It was about that time that citizens who had made possible the first parks began to realize the need for a board of park commissioners with power to plan for future needs and acquire other park property.”¹¹ This is probably a reference to the bond issue that purchased Southern Park.

The Board of Park Commissioners was formed in April and \$10,000 appropriated to remodel and repair what had previously been done without planning.¹²

John C. Olmsted of Brookline, Massachusetts was engaged in October 1895 to develop a major park plan for Indianapolis which included “...a series of squares or small parks, distributed about the city; local or in-city parks, of one hundred acres or so; ...and finally a system of connecting parkways along Fall Creek and White River. Real progress in park development began at this time.” Mayor Taggart began acquiring park lands around the city.¹³ 10 more acres added to Garfield west of present Conservatory.¹⁴

One of the board’s first acts was the authorization of a stone dam to create a four-acre lake in Garfield Park. This was considered a two-fold necessity – one for use of those who frequented the park and the other with a view to creating an adequate reserve water supply for the city.”¹⁵ “A lagoon, bounded by Raymond Street and Pleasant Run Parkway was a popular boating and ice-skating pond in the early 1900s.”¹⁶

A propagating greenhouse with 40,000 feet of space was erected along South Garfield Drive.¹⁷

1896 The 1st Annual Report of Board of Park Commissioners (for 1895) was published.

The 2nd Annual Report (for 1896, published in 1897) reported that 72,000 plants had been grown and planted in Garfield Park and plants were also supplied to other parks and properties. Most of the funding for Garfield Park had been spent on the greenhouses and gardens. The Commissioners decided to separate the greenhouse system from the rest of the park into a division by itself.

The planting was described as “...half barrels made into vases displaying plants and vines...” Several hundred trees and shrubs were planted and are listed. Dead trees were removed resulting in forty-five cords of fuel for the greenhouses. Trees were trimmed, and brush was removed from Bean Creek.¹⁸

GARFIELD PARK CULTURAL LANDSCAPE REPORT

Appendix A: Chronology

A streetcar line was completed connecting the Park with the city.¹⁹

There was “little improvement until about 1896 when a private citizen obtained permission to install a tennis court, which was followed by others; gradually by baseball diamonds, horseshoe pitching courts and children’s playgrounds.”²⁰

1899 The city purchased and added 4.59 acres to the northwest corner of the Park at the intersection of Raymond Street and the railroad.²¹ The Grove of Remembrance would later be planted there.

1901 The addition of new greenhouses expanded space to 200,000 square feet. A bicycle path was built.²²

1902 The Park had become a show place with eighty-four flowerbeds in the outdoor garden. Ongoing work was reported on paths, drives, lawns, repairs to the dam and dredging of the lagoon, and continued planting of trees and shrubs was reported.²³

1903 “Every one speaks well of the condition of Garfield, which today is the best improved large park in the city”.²⁴ The Pagoda was constructed and opened, giving views over the park and to downtown skyline. It was used as a bandstand and for dancing.²⁵

1904 The 10th Annual Report refers to the “management of park forests” with the remnants of Bradley Woods interspersed through the ongoing new tree planting. Footpaths, tennis courts, new play equipment, and lights were installed. This report itemizes all the work done to date on the park.²⁶

1905 Garfield Park greenhouses grew 200,000 plants for the city, with 50,000 planted in the Park. Greenhouse capacity increased from 40,000 to 200,000 sq ft. A zoo opened with monkeys, a bear, and “small animal cages”. A waiting station was erected on the railway loop, brick and stone corner and entrance posts were built, and another tennis court constructed.²⁷

Continuous improvements were made to the road system and there was ongoing expansion of the gardens through the early 1900s.²⁸

1908 The Parks Board was reorganized and given a new mandate and new powers, including funding.²⁹

George Edward Kessler, a respected landscape architect from Kansas City, was hired by the Indianapolis Department of Parks as consulting landscape architect. Kessler had trained in Germany and had worked as apprentice laborer for Frederick Law Olmsted on Central Park.³⁰

GARFIELD PARK CULTURAL LANDSCAPE REPORT

Appendix A: Chronology

His charge was the general direction of park administration and maintenance, and the specific supervision of the “constructive work of the department” including design and development of a general park and boulevard system for the city, which produced the Parks Boulevard System that exists today. He designed Riverside Park, University Square, sections of Garfield Park, and “made significant improvements in other city parks and along Indianapolis waterways.”³¹

Today (1929) “there is noticeable scrambling by groups and organizations to get these benefits for their districts... authorities...are called upon ever to keep their minds on the fundamentals of the Olmsted and Kessler plans...in response to popular approval and desire the Park Board has proceeded since 1908 to expand its land holdings.”³²

“Although all the parks in Kessler’s Parks Boulevard plan were built on the model of driving parks ...for Garfield Park he chose a more formal landscape design. Although he preserved the central picturesque open areas protected by natural woodlands...his formalist talents were highlighted in the design of Garfield Park’s Conservatory and the Outlook.” Garfield Park is more intimate than other more open parks having areas designed to enrich the park’s community offerings with space for playgrounds, ball fields, and picnic areas, along with “elegant pathways for repose and reflection.”³³

Kessler notes that “considerable improvement has been made in Garfield Park, and it is my recommendation that additional work of an important character be carried on here during the coming year. Especially the eastern boundaries must be considered on account of the encroachment of buildings needing proper street connection”.³⁴

1909 Kessler’s “Report of Landscape Architect” in the 15th Annual Report of the Board of Park Commissioners contains a description of his Park and Boulevard Plan, and speaks of 1908 as “the time of the reorganization of your entire work.” “Of the larger properties, Garfield Park has received the greatest measure of improvement, and in its constant use, shows public appreciation of such development.”³⁵

1910 Park consisted of 104.59 acres. ³⁶

“(T)wo small bathing beaches (developed) in the waters of Bean Creek, one for boys and another for girls... helped very greatly to alleviate the hot weather discomfort of the children who visited Garfield Park.”³⁷

There was also “very extensive planting” and “the building of a group of three tennis courts in a new location at the foot of the bluff not far from the shelter house. The tennis courts had been in the grove toward the south end of the park, where the drainage was insufficient, and it seemed wise last spring to move all but one of these courts.”³⁸

“one of the most urgent needs of the Park Department is for the reconstruction of the dam at the foot of the lagoon in Garfield park, together with a rebuilding of the abutments of

GARFIELD PARK CULTURAL LANDSCAPE REPORT

Appendix A: Chronology

the bridge which spans Pleasant Run just below this dam.” Every time there was a heavy rain the side of the dam was washed out.³⁹

- 1911** In the Annual Report Kessler argued for the Pleasant Run parkway from Ellenberger Woods on the east, to Garfield Park on the south, and through Garfield Park to the White River.⁴⁰
- 1913** The acquisition of 29.14 acres in the southeast area along Shelby Street brought the total land to the final 128.52 acres for the Park.⁴¹

Kessler’s master plan for Garfield Park (see Chapter III, Plan KP1913) included more built features than any other park he designed for Indianapolis. It was intended to be the most compact and intimate of the three large city parks he envisioned to serve large numbers of the population. Each would be a unique park experience. The circulation system for the park included a circumferential carriage drive with a variety of views and vistas. There were entries from Raymond Street, Shelby Street, and Southern Avenue, walks from neighborhoods to major park features, and curving paths creating secondary loops within the park circumference. A small depot was built at the west entrance on Southern Avenue as a stop for the electric train. Lagoons were created for scenic, recreational, and flood control purposes. The design included informal massing of trees and shrubs for shaded lawn areas or enclosed meadows, and formal tree plantings along bordering streets.⁴²

Kessler designed a formal parterre for Garfield Gardens, which would become the Sunken Gardens, and drafted the design for the Conservatory area overlooking the parterre “making this particular portion of Garfield Park a certain attraction throughout the entire year.” Pleasant Run Parkway north drive was extended from Raymond through Garfield Park to Meridian and the South drive from Madison to Meridian.⁴³

Plans for Pleasant Run Parkway planting in Garfield Park show “naturalistic planting or natural vegetation between the parallel drives, along the creek bed; uniform street tree plantings in tree-lawns are indicated at parkway borders adjacent to residential districts.”⁴⁴

- 1914** In his ‘Report of Landscape Architect’ Kessler describes Garfield Park as “a naturally very beautiful park. It contains a characteristically fine beech forest, with all its beauty, both Winter and Summer; ample open lawns and open places for children’s playgrounds, the playfields for adults as well, with beautiful settings for each of the several fields for outdoor play.”

The Park would be distinctive, however, for the planned floral display on the newly acquired land that would surround the conservatory. The Garfield Gardens were to be built below street level to give views of the floral displays. The design would be “a long parterre running parallel with the roadway above, and practically in the form of a cross, another garden along absolutely formal lines toward the west, and merging at the west end into the forest background of the park.” Summer planting was to be very formal and

GARFIELD PARK CULTURAL LANDSCAPE REPORT

Appendix A: Chronology

elegant – relying more on foliage than flowers – with more informal displays of summer flowers and hardy perennials along the north and south sides. Grass paths with stepping stones would “give access to each separate section, and perhaps to each separate class of flowers displayed there.” The “jewel” of the gardens would be framed by shrubs and trees.⁴⁵

- 1915** New greenhouses were built. The Outlook (“Lookout”) overlooking the Garfield Gardens was completed. The finished Outlook was 196 feet long, 95 feet wide, 7 feet above the Garden. Fourteen Bedford stone bowls topped the bush-hammered walls. The final cost in 1915 was \$34,700.30.⁴⁶

The statue of General Henry Ware Lawton, Civil War hero, was moved to the Park from the County Court House. The monument, described as “...an exceptionally high-grade piece of art work, is much better appreciated in its new setting.” The sculpture by Andrew A. O’Connor as an apprentice in Daniel C. French’s studio won an international prize when exhibited in Paris in 1906.⁴⁷

Kessler resigned from the Parks Department on December 31st.⁴⁸

- 1916** The working drawings for Garfield Gardens were prepared by Vonnegut and Bohn, Architects. These included the brick walks, the three fountains, the planter urns and lighting on concrete standards.⁴⁹ The fountains at the east end of Sunken Garden were designed and built by F.W. Darlington of Chicago. They were the first in the country to be equipped with the mechanics to allow changing the spray patterns and the lights according to season and holiday. On Memorial Day the colors were red, white, and blue, on other days gold and white. Called the “dancing” waters, they were used for light shows at night.⁵⁰

The official dedication of the Sunken Garden was on October 29th.⁵¹

Considerable work continued on the drives and walks, on a new entrance from Raymond Street south of the stream, and on a pedestrian entrance from Shelby Street.⁵²

- 1915-1918** The city annexed much of the former Yoke farmstead around the park (the house still exists) and neighborhood began to be more densely built up, but much of the nearby land remained as small truck farms until the 1950s.⁵³

- 1917** A rustic bridge was constructed.⁵⁴

- 1918** Changes in planting design were made in the Garfield Gardens. Evergreens were planted on the slopes of the hill.⁵⁵

- 1920** WWI Grove of Remembrance was dedicated.⁵⁶ (The first Grove of Remembrance was in Druid Hill Park in Baltimore in 1919).

GARFIELD PARK CULTURAL LANDSCAPE REPORT

Appendix A: Chronology

“In 1920 the Annual Report told of a landscaping change in the Sunken Gardens. Perennial beds were changed to make long beds sweeping toward the center, leaving the center open for lawn”. “The rose garden was renewed by digging out 2’ of topsoil, laying 6” of cinders for drainage and placing a clay topsoil over the remaining 18”. A study was begun to determine which species and varieties to use that would harmonize in height, color and time of bloom.”⁵⁷

- 1921** The colonial architecture-style Shelter House/Community Center designed by Frank B. Hunter was built.⁵⁸

A bronze and marble sundial, “The Flight of Time” by Myra Reynolds Richards, was placed in the rose garden. The gnomon was a crouching Indian with a bow pointed toward the north star. It was constructed of white cement, four feet in diameter, with numerals of marble and the dial of terraza (sic) with bronze.⁵⁹

- 1920s** Six clay tennis courts were constructed on land at Shelby Street and Southern Avenue.⁶⁰

- 1922** The Outdoor Shelter house and Garfield Amphitheater opened.⁶¹

The Amphitheater, also called the Bandshell, first opened as a repertory theater with open-air concerts and a new play each week.⁶²

Plans were made for the tunnel to the Shelter house.⁶³

- 1923** The Annual Report notes that “land south of the Park is not to be considered for additions.”

- 1929** The memorial to Confederate prisoners held at Camp Morton, Indianapolis was moved from Greenlawn Cemetery to the south side of the park.⁶⁴

- 1930** The first constructed swimming pool opened, replacing the two Bean Creek bathing beaches – one for boys, one for girls – and the original playground was moved and reduced in size.⁶⁵

- 1932** “A well was drilled ‘to escape high water meter charges’ and to restore the lagoon that had been permitted to dry up years before.”⁶⁶

- 1936** The first Indianapolis Symphony performance at the Amphitheater was presented.⁶⁷

At this date the Park consisted of twenty acres of gardens including the Sunken Gardens, a rose garden and an alpine garden.⁶⁸

The Sunken Gardens were redesigned with new beds made and sod relaid on the older beds. Adjacent to the Gardens across Bean Creek, the Alpine Garden was enlarged.

GARFIELD PARK CULTURAL LANDSCAPE REPORT

Appendix A: Chronology

Stones, evergreens, shrubs and hardy perennials were transplanted from other places in Garfield Park.⁶⁹

The General Superintendent of Parks makes reference to “improvements to the sunken gardens at Garfield park and construction of a five-acre lake...From a 5 acre pond dammed up for ice skaters, much soil and gravel was dredged and used for fill on athletic fields and creek banks.”⁷⁰

- 1937** The shrubbery surrounding the Sunken Gardens was removed because the faster speed of cars than buggies required more open space for motorists to be able to view the flowers and the fountains.⁷¹

Rock gardens were developed on the western bank of Bean Creek.⁷²

- 1945** Blueprints for a new amphitheater were completed early in January. The project was considered morale booster needed before the war was over as a “pre-postwar project”. The new amphitheater would replace the existing bandshell that had been used only for band concerts for the previous few years. A summer 1944 trial run of the Pirates of Penzance had been a huge success. “. . . the area is bountifully surrounded by colorful native trees and flowering shrubs” has accessibility, mass transportation facilities, utilities available and parking in new and existing areas and along the park’s two miles of drives. In the plans “Landscaping of the area was accomplished without necessitating the removal of any of the existing trees or shrubs and others will be added.”⁷³

- 1946** “Vandals wreck famous fountain – may be beyond repair”⁷⁴

- 1947** “Lagoon being dredged for ice skating”⁷⁵

- 1950s** Area residents began to rally support for the Park. The “Pennies for the Pagoda” campaign began.⁷⁶

- 1951** An allocation of \$15,000 was reserved for the repair of the Sunken Gardens’ fountains, “which had been inoperative for some years now.”⁷⁷

- 1952** A model yard garden was opened at the edge of the Sunken Garden above Bean Creek to demonstrate how “any person can landscape his back yard at reasonable cost and maintain that garden.” It was sponsored by the Indianapolis Star, Chamber of Commerce, and the city administration, and continued for several years as the “Yard Parks.”⁷⁸

A weekly concert was attended by 5000 people.⁷⁹

- 1953** The renovated fountains and Sunken Gardens were formally reopened.⁸⁰

GARFIELD PARK CULTURAL LANDSCAPE REPORT

Appendix A: Chronology

- 1954** The Conservatory was replaced with a 200' x 50', welded aluminum-frame conservatory with an Art Deco style façade. It was described by its architect, David V. Burns of Burns and Burns Architects, as the first all-aluminum, all-welded greenhouse in the United States, with a "rigid frame design" that would not need pillars and trusses. This was "...ideal because there is less shadow. It is also interesting to note the 26½° roof pitch, which is the same degree of tilt of the earth."⁸¹
- 1955** The new Conservatory was constructed at a cost of \$400,000.⁸²
- "Disturbances at park dances causes removal of juke box from pavilion," and "Teen-age dances to be resumed."⁸³
- 1957** A plan for an elevated super highway threatened to divide the Park, but in 1958 the decision was made to avoid the park.⁸⁴
- 1960** By the 1960s the neighborhood had changed to a more densely-built, mixed residential, commercial, and industrial district. 1962 was the population peak for the area.⁸⁵
- 1964** The newspapers noted that the walks were crumbling into disrepair and weeds marred the 'model yard park'.⁸⁶
- 1965** The Indianapolis Times reported the Parks Department's landscape architect speaking of plans to rebuild the Sunken Gardens brick walkways.⁸⁷
- 1966** A suggestion was made to repair the Sunken Gardens walkway by reusing some of the brick from the outer walks for the inner walk.⁸⁸
- 1967** A long-range \$150,000 renovation of Garfield Park was announced in the Indianapolis News, to include repairing the brick walkway and the exterior front of the Conservatory. The chief engineer had found the original 1903 drawings of the Pagoda showing the spiral iron staircase, which it was hoped to restore. The brick walkway had an unusual size and color of bricks that would be difficult to replace. The plan was to take brick from outer walkway to replace missing bricks in the center of the gardens. The greenhouse immediately east of the gardens was to have major repairs and repairs to exterior (presumably this refers to the Conservatory).⁸⁹
- The Shelby Street library opened - a "recently built and handsome modern library...on a small piece of former park ground."⁹⁰
- 1969** A retrospective newspaper article makes it clear the lake had been gone for some time.⁹¹
- 1970** New playground areas and baseball diamonds were added at the Park.⁹²
- 1972** City park officials promise not to replant vandalized trees in an area where local children play football and baseball.⁹³

GARFIELD PARK CULTURAL LANDSCAPE REPORT

Appendix A: Chronology

A news photograph shows the fountains at night with the caption: “1st time in two years it is operating”.⁹⁴

1973 The Pagoda had been condemned, surrounded with chain link fencing, and was scheduled to be removed “when time permits”, but the Department of Parks & Recreation had no definite plans to demolish the structure, or to repair the park. It was suggested by the Department that active citizen participation would be needed before any positive action could be taken.⁹⁵

1974 The year of the 100th anniversary of Garfield Park. Despite the deterioration the park was still “one of the city’s great landmarks”. The fountains and concerts are ongoing and popular, but the site of the old lagoon was “unhandsome with weeds growing around it.”⁹⁶

1975 The Alpine Garden had degenerated into roughly terraced slopes of perennials, grasses and more rank growth.⁹⁷

1976 The Save the Pagoda campaign had been successful and bids were sought for restoration. Citizen outcry and rallying led by neighborhood homeowner Marjorie F. Nackenhorst was a deciding factor.⁹⁸

1977 A two-year renovation of Sunken Garden began. Repairs were carried out on the Pagoda, including painting, building a new roof, replacing the structural steel and restoring the concrete floor.⁹⁹

1978 The Gardens had been under construction (renovation) for two years. The first phase included repair of the planter in front of the greenhouse (Conservatory), restoration of the steps leading into the gardens, brick walkways, and fountains. The second phase consisted of major landscaping surrounding the gardens, tree planting, reconstruction of a bridge over Bean Creek, and a sprinkler system.¹⁰⁰

1979 The swimming pool and tennis courts were remodeled with a horseshoe pitch and shelter constructed parallel to swimming pool.¹⁰¹

The renovation of the Sunken Gardens was finished, but an article in the Star listed all the unfinished or non-working elements.¹⁰²

The renovation of Pagoda was nearly complete.¹⁰³

1981 A Garfield Park master plan for remodeling and rehabilitation was studied by area residents and city officials and approved.¹⁰⁴

Garfield Park was to be closed at ten p.m. to discourage congregating by young people.¹⁰⁵

GARFIELD PARK CULTURAL LANDSCAPE REPORT

Appendix A: Chronology

1983 The Conservatory was renovated and reopened.¹⁰⁶

1987 Fire by arson destroyed the Conservatory.¹⁰⁷

1988 The railings on the Conservatory Drive bridge over Bean Creek were replaced duplicating the design of the old railing. The other two bridges over Bean Creek have an unusual modified garden wall design of stone blocks and voids. Center Drive bridge over Pleasant Run is an arched span. “Driving over it is a novel experience, which adds to the character of Garfield Park”.¹⁰⁸

Area residents offered ideas for a new master plan for park.¹⁰⁹

1989 Area residents won a partial victory on the fire station site. The sledding hill and sports fields would be left intact.¹¹⁰

The Garfield Park Master Plan was completed by the Department of Metropolitan Development, Division of Planning, for the Dept. of Parks and Recreation. One of its recommendations was to control undesirable vehicular traffic by closing the drive in front of the Conservatory and creating a pedestrian plaza.

1992 A tornado destroyed twenty percent of the park’s trees.¹¹¹

1993 Plans for park renovation were approved and major funding was made available for renovation. The Sunken Gardens were to be brought back to “their 1920s glory.”¹¹²

1994 The amphitheater was re-named in honor of P.E. MacAllister, for his philanthropic, civic and community support of the arts in Indianapolis.¹¹³

Drawings were developed for the removal of the drive at the Conservatory and its replacement with a pedestrian plaza with walks on the former drive alignments.¹¹⁴

1995 A campaign for the restoration of MacAllister Center began with P.E. MacAllister as chair of the Indianapolis Parks Foundation.¹¹⁵

The WWI Grove of Remembrance was re-dedicated.

Conservatory plaza and walks and related improvements were completed.¹¹⁶

1996 The new aquatic center pool and water slide was opened.¹¹⁷

Lilly Endowment Inc donated \$4 million to continue the restoration. The Pagoda, playground, MacAllister Center amphitheater, the Conservatory mechanical and facility improvements, walkways and irrigation in the Sunken Gardens had already been restored at a cost of \$5 million. Half the new grant would be used for the new family center. Other improvements would include replacement of all glass, installation of a security

GARFIELD PARK CULTURAL LANDSCAPE REPORT

Appendix A: Chronology

system, greater energy efficiency and climate control, and repairs to the limestone façade of the Conservatory; and repairs or replacement of fountains, urns, lamps and crushed-stone walks, electrical upgrading, a new irrigation system and landscaping for the Sunken Gardens.¹¹⁸

1997 The Conservatory and MacAllister Center renovations were completed and dedicated.¹¹⁹

The Conservatory introduced its permanent rainforest theme.¹²⁰

1998 The Burrello Family Center opened with an indoor gymnasium, weight room, locker room and outdoor basketball court and the adjoining outdoor swimming and spray pool. The historic pool near the Amphitheater was filled in and replaced by a parking lot.

The Sunken Gardens were restored to their 1920s form. Highlights included the fifty-six huge urns with tile inserts of the oak leaf motifs, and the three fountains, framed by walkways, plantings and a new wrought iron fence.

The Pagoda was renovated and a new playground added.

Numerous upgrades were made to the MacAllister Center for the Performing Arts. The amphitheater now seated more than 3,000 patrons.

A walking trail was completed within the park, linking with the new inter-park Pleasant Run Trail.

The old family center, which had become an arts center, was being considered for possible use as classrooms.¹²¹

The Friends of Garfield Park (FOGP) was founded under an initiative of the Indianapolis Parks Foundation's Partners in Parks with a mission to protect and enhance the investment of public and private funds, continue to raise funding, provide effective advocacy, and expand stewardship.¹²²

1999 The Sunken Gardens was awarded a Centennial Medallion by the Indiana Chapter of the American Society of Landscape Architects as one of the "well-loved landscapes that reflect our history, culture, and communities" and one of Indiana's "most significant works of landscape architecture."¹²³

2003 The Friends of Garfield Park received a grant from a local foundation and raised matching funds to undertake a Cultural Landscape Report. Heritage Landscapes, preservation landscape architects and planners were selected as the project leader. The effort is coordinated with Indy Parks & Recreation and engages the community through public meetings and a user survey.¹²⁴

GARFIELD PARK CULTURAL LANDSCAPE REPORT
Appendix A: Chronology

GARFIELD PARK CULTURAL LANDSCAPE REPORT

Appendix B: Garfield Park Tree Inventory Categories & Species List

GARFIELD PARK TREE INVENTORY CATEGORIES

This list of tree inventory categories provides the codes used by the 2003 Garfield Park Tree Survey to describe the physical condition of 90% of trees within Garfield Park.

Roots	U	Unrestricted: open
	U/R	Partially Restricted: One side paving, less than full root zone
	R	Restricted: Enclosed within three to four feet of tree on two sides
Trunks	1	Fine: no visible damage
	2	Minor: minor decay issues
	3	Major: wounds, mushrooms, or cracks
Canopy	A	Good: full crown, vigorous growth, no immediate care required
	B	Fair: minor problems, maximum of 2" deadwood, minor pruning recommended
	C	Poor: major problems, deadwood of 3-4" and not more than six branches, major pruning recommended, possible hazard to be monitored for possible removal
	D	Failing: major dieback in crown, near dead, hazard to be removed
	E	Dead: Stump or tree stumpdepression (tree identified if possible)

GARFIELD PARK TREE SPECIES LIST

This list provides the codes used in the 2003 Garfield Park Tree Survey to record tree species. The list references each tree by code, botanical name (genus and species), and common name.

Code	Botanical/Common Name
Ab	<i>Abies balsamea</i> /Balsam Fir
Ac	<i>Acer campestre</i> /Hedge Maple
Ap	<i>Acer platanoides</i> /Norway Maple
Apr	<i>Acer platanoides</i> cv./Norway Maple crimson cv.
Ar	<i>Acer rubrum</i> /Red Maple
As	<i>Acer saccharinum</i> /Silver Maple
Asa	<i>Acer saccharum</i> /Sugar Maple
Aegl	<i>Aesculus glabra</i> /Ohio Buckeye

GARFIELD PARK CULTURAL LANDSCAPE REPORT

Appendix B: Garfield Park Tree Inventory Categories & Species List

Aeh	<i>Aesculus hippocastanum</i> /Common Horsechestnut
Aa	<i>Ailanthus altissima</i> /Tree-of-Heaven
Alg	<i>Alnus glutinosa</i> /European Alder, Black Alder
Al spp.	<i>Alnus</i> species/Alder species
Ama	<i>Amelanchier arborea</i> 'Aut Brill'/Downy Serviceberry, Shadblow
Amc	<i>Amelanchier canadensis</i> /Serviceberry, Shadbush
Bn	<i>Betula nigra</i> 'Heritage'/River Birch
Cab	<i>Carpinus betulus</i> /European Hornbeam, Ironwood, Musclewood
Ca spp.	<i>Carpinus</i> species/Hornbeam species
Cb	<i>Catalpa bignoides</i> /Southern Catalpa, North American Beantree
Cs	<i>Catalpa speciosa</i> /Northern Catalpa
Ceo	<i>Celtis occidentalis</i> /Common Hackberry
Ce spp.	<i>Celtis</i> species/Hackberry species
Cc	<i>Cercis canadensis</i> /Eastern Redbud
Cf	<i>Cornus florida</i> /Flowering Dogwood
Cm	<i>Cornus mas</i> /Corneliancherry Dogwood
Crp	<i>Crataegus phaenopyrum</i> /Washington Hawthorn
Cr spp.	<i>Crataegus</i> species/Hawthorn species
Ee	<i>Euonymus europaeus</i> /European Euonymus
Fg	<i>Fagus grandifolia</i> /American Beech
Fsy	<i>Fagus sylvatica</i> /European Beech
Fra	<i>Fraxinus americana</i> /White Ash
Frn	<i>Fraxinus nigra</i> /Black Ash
Frp	<i>Fraxinus pennsylvanica</i> /Green Ash
Gb	<i>Ginkgo biloba</i> /Ginkgo
Glt	<i>Gleditsia triacanthos</i> var. <i>inermis</i> /Thornless Honey Locust
Gyd	<i>Gymnocladus dioica</i> /Kentucky Coffeetree
Jn	<i>Juglans nigra</i> /Black Walnut
Jv	<i>Juniperus virginiana</i> /Eastern red cedar
Kp	<i>Koeleruteria paniculata</i> /Golden Raintree
Ls	<i>Liquidambar styraciflua</i> /Sweetgum
Lt	<i>Liriodendron tulipifera</i> /Yellow-poplar, Tuliptree
Mas	<i>Malus</i> cultivar Sugar Tyme™/Sugar Time Apple
Ma spp.	<i>Malus</i> species/Apple species
Mor	<i>Morus alba</i> /White Mulberry
Mor spp.	<i>Morus</i> species/Mulberry species
Pia	<i>Picea abies</i> /Norway Spruce
Pib	<i>Picea breweriana</i> /Brewer Spruce
Pig	<i>Picea glauca</i> /White Spruce
Pnig	<i>Pinus nigra</i> /Austrian Pine
Pip	<i>Picea pungens</i> /Colorado Spruce
Pipg	<i>Picea pungens glauca</i> /Colorado Blue Spruce
Pst	<i>Pinus strobus</i> /Eastern White Pine
Psyl	<i>Pinus sylvestris</i> /Scotch Pine
Ptan	<i>Pinus tanyosho</i> [now <i>P. densiflora</i>]/Tanyosho Pine, Umbrella Pine

Appendix B: Garfield Park Tree Inventory Categories & Species List

Ploc	<i>Platanus occidentalis</i> /American Planetree, Sycamore
Popd	<i>Populus deltoides</i> /Eastern Cottonwood
Prs	<i>Prunus serotina</i> /Black Cherry
Prser	<i>Prunus serrulata</i> ‘Kwanzan’/Kwanzan Flowering Cherry
Pr spp.	<i>Prunus</i> species/Cherry species
Py	<i>Pyrus calleryana</i> /Callery Pear
Py spp.	<i>Pyrus</i> species/Pear species
Qa	<i>Quercus alba</i> /White Oak
Qc	<i>Quercus coccinea</i> /Scarlet Oak
Qi	<i>Quercus imbricaria</i> /Shingle Oak
Ql	<i>Quercus lyrata</i> /Overcup Oak
Qma	<i>Quercus macrocarpa</i> /Bur Oak
Qmu	<i>Quercus muehlenbergii</i> /Chinkapin Oak
Qp	<i>Quercus palustris</i> /Pin Oak
Qr	<i>Quercus rubra</i> /Red Oak
Qv	<i>Quercus velutina</i> /Black Oak
Rp	<i>Robinia pseudoacacia</i> /Black Locust
San	<i>Salix nigra</i> /Black Willow
Sx spp.	<i>Salix</i> species/Willow species
Sa	<i>Sassafras albidum</i> /Sassafras
Sj	<i>Styrax japonicus</i> /Japanese Snowbell
Syr	<i>Syringa reticulata</i> /Japanese Tree Lilac
Sy spp.	<i>Syringa</i> species/Lilac species
Tx	<i>Taxus cuspidata</i> ‘Capitata’/Japanese Yew
Ta	<i>Tilia americana</i> /Basswood, American Linden
Ta	<i>Tilia americana</i> ‘Redmond’/Redmond Basswood, Redmond Linden
Tc	<i>Tilia cordata</i> /Littleleaf Linden
Tcan	<i>Tsuga canadensis</i> /Eastern Hemlock
Ua	<i>Ulmus americana</i> /American Elm
Ug	<i>Ulmus glabra</i> ‘Camperdownii’/Wych Elm
Upu	<i>Ulmus pumila</i> /Siberian Elm
Ur	<i>Ulmus rubra</i> /Slippery Elm, Red Elm
U spp.	<i>Ulmus</i> species/Elm species
Zs	<i>Zelkova serrata</i> /Japanese Zelkova

Park User Survey

GARFIELD PARK CULTURAL LANDSCAPE REPORT

November, 2003

A Cultural Landscape Report for Garfield Park is underway and as a part of the planning process, the Friends of Garfield Park and the preservation landscape architecture firm of Heritage Landscapes are asking users of the park to complete this survey. The user survey results will increase our understanding of the current uses and user desires for Garfield Park.

This process seeks the input of the local community and park users. Please encourage other park users of all ages to complete and return the survey. Return the completed form by Dec. 1, 2003 to specially marked boxes at the Burrello Family Center or Garfield Park Conservatory or by mail. Your time is greatly appreciated.

In which seasons do you use Garfield Park? (check all that apply)

- | | |
|---------------------------------|---------------------------------|
| <input type="checkbox"/> Summer | <input type="checkbox"/> Winter |
| <input type="checkbox"/> Fall | <input type="checkbox"/> Spring |

How often do you come to Garfield Park?

- | | |
|--|--|
| <input type="checkbox"/> Daily | <input type="checkbox"/> A few times a month |
| <input type="checkbox"/> More than once a week | <input type="checkbox"/> A few times a year |

How long do you usually stay Garfield Park when visiting?

- | | |
|---|--|
| <input type="checkbox"/> 1 hour or less | <input type="checkbox"/> more than 3 hours |
| <input type="checkbox"/> 1-3 hours | |

When you come to Garfield Park, do you come (check all that apply):

- | | |
|--|---|
| <input type="checkbox"/> Alone | <input type="checkbox"/> With a family member |
| <input type="checkbox"/> With a friend | <input type="checkbox"/> With a group |

What do you do when visiting Garfield Park? (check all that apply):

- | | |
|--|--|
| <input type="checkbox"/> Jog/Exercise Walk | <input type="checkbox"/> Watch Events |
| <input type="checkbox"/> Leisure Walk | <input type="checkbox"/> Watch Sports |
| <input type="checkbox"/> Dog Walk | <input type="checkbox"/> Play Catch /Frisbee |
| <input type="checkbox"/> Sled | <input type="checkbox"/> Play Baseball |
| <input type="checkbox"/> Swim | <input type="checkbox"/> Play Co-Ed/Little League Baseball |
| <input type="checkbox"/> Tennis | <input type="checkbox"/> Play Softball |
| <input type="checkbox"/> Play at Playground | <input type="checkbox"/> Play Co-Ed Softball |
| <input type="checkbox"/> Skateboard | <input type="checkbox"/> Play Football |
| <input type="checkbox"/> Bicycle | <input type="checkbox"/> Play Small Fry/ Pee-Wee Football |
| <input type="checkbox"/> Enjoy Nature | <input type="checkbox"/> Play Basketball |
| <input type="checkbox"/> Sunbathe | <input type="checkbox"/> Play Pick Up Ball Games |
| <input type="checkbox"/> Relax | <input type="checkbox"/> Attend Programs/ Events Conservatory |
| <input type="checkbox"/> Visit Sunken Garden | <input type="checkbox"/> Attend Programs/ Events Art Center |
| <input type="checkbox"/> Picnic | <input type="checkbox"/> Attend Programs/ Events Family Center |
| <input type="checkbox"/> Socialize | <input type="checkbox"/> Attend Programs/ Events Amphitheater |
| <input type="checkbox"/> Meet Friends | <input type="checkbox"/> Attend Programs/ Events Sunken Garden |
| <input type="checkbox"/> Watch People | <input type="checkbox"/> Other _____ |
